shakir-kamal.vercel.app surekeys.ng

Summary

Full-stack developer with 3+ years building production web applications across fintech, government ERP, edtech and real estate. Strong in React, Next.js and TypeScript, with backend experience in NestJS, Node.js and MongoDB. Designed, built and launched SureKeys, a rental platform, solo and end to end. Experienced working remotely with distributed product and engineering teams.

Professional Experience

Founder & Full-Stack Developer, *SureKeys (surekeys.ng)* 2026 – Present
Remote

- Designed, built and launched a rental platform for the Abuja market as a solo engineer: Next.js (App Router), NestJS, MongoDB, BullMQ and Tailwind CSS, deployed on Vercel with Cloudflare DNS.
- Built a listings system with full move-in cost breakdowns (rent, agency, legal, caution, service charge), photo and video media, and Open Graph previews for sharing on WhatsApp and Facebook; 50+ live listings.
- Designed a review flow that unlocks agent reviews only after a tenant-confirmed inspection, preventing fake reviews.
- Built a lead-capture flow so renters can request a property without creating an account, plus gated contact details and inspection booking for signed-in users.
- Reduced NestJS dev-server memory usage significantly by switching the build from ts-node to the SWC compiler.

Frontend Developer, *Connexxion Group* 08/2025 – Present
Abuja

- Contributing to iGov, a government ERP platform used by parastatals for document signing, e-meetings, memos, circulars and administrative workflows.
- Building features across the stack with React, Node.js and REST APIs, including authentication flows, API integration and data management in a high-usage environment.
- Worked on SchoolPro, an education platform for student–lecturer communication and academic management.
- Contributed to a Police digital system focused on digitising critical operational workflows.
- Collaborate with cross-functional teams to turn requirements into scalable technical solutions.

Senior Frontend Developer, *Xanotech* 01/2025 – 03/2025
Remote

- Led frontend development for Landest, a real estate platform with user-facing and back-office applications for property management and discovery.
- Built user and admin dashboards integrating REST APIs, with a focus on performance.
- Built secure UI for transactions and payment flows on Kryppay (fintech/crypto) and contributed to digital banking interfaces for GMFB.
- Built features for GCLMS, an edtech learning platform.

Frontend Developer, *IRecharge* 2024
Abuja

- Led a team to design and build the admin interface for 1UBank, a digital banking application used by internal stakeholders.
- Built frontend features for Accelerate, 1UBank and IRecharge bill-payment and banking products.
- Implemented reusable, maintainable UI components and improved load times across platforms.
- Took part in code reviews, UI/UX improvements and feature rollouts on production financial platforms.

Frontend Developer, *Lumofy* 08/2023 – 10/2023
Remote

- Built accessible, responsive interfaces for an edtech platform using React and MUI for students and educators.
- Worked in sprints with product managers and designers; contributed to sprint planning and code reviews.
- Created modular components and improved SEO and performance for a faster user experience.

Frontend Developer, *Viveamind* 01/2023 – 06/2023
Remote

- Built a patient-facing interface for a medical company to book appointments, manage schedules and access information.
- Developed and maintained web applications with Next.js, TypeScript and Tailwind CSS.
- Delivered 16 new user interfaces in a team of four, working closely with stakeholders.

Skills

Frontend: React, Next.js, TypeScript, JavaScript, Redux / RTK Query, React Query, Tailwind CSS, Material UI, Chakra UI, React Native

Backend: NestJS, Node.js, RESTful APIs, MongoDB, PostgreSQL, BullMQ

Tools & other: Paystack, Jest, Git, Vercel, Cloudflare

Education

Bachelor of Software Engineering, *Ahram Canadian University* Cairo, Egypt
